

Upgrade to ENERGY STAR®

ENERGY STAR® certified manufactured homes are designed, manufactured, and installed to meet energy efficiency requirements set by the U.S. EPA. The result is a home that is at least **10% MORE EFFICIENT** than a model built to minimum code.

LOWER UTILITY BILLS

According to the EPA, you can typically save hundreds of dollars each year on energy costs in an ENERGY STAR certified manufactured home because they use less energy.

MORE COMFORT

The energy-efficiency features found in ENERGY STAR certified manufactured homes provide a more comfortable living environment. Your house will stay warmer in the winter and cooler in the summer.

INDEPENDENT QUALITY CHECKS

A third-party 'Quality Assurance Provider' performs ongoing inspections of manufacturing home building facilities to ensure that the ENERGY STAR certified manufactured homes they produce deliver on their promised features and benefits.

ENERGY STAR® is the simple choice for energy efficiency. For more than 25 years, EPA's ENERGY STAR program has been America's resource for saving energy and protecting the environment. Join the millions making a difference at energystar.gov.
